

# SOA BootCamp™

## Corporate-wide understanding of success through Service Oriented Architecture (SOA)

SOA basic training offers both business and IT professionals' insight on SOA and its ability to drive business benefit. SOA Boot Camp offers a full-day training session covering all members across an organization, including Executives (CIO, CTO, VP and Directors), Business Managers, SOA and Integration Managers, Solution Architects, Management, Business Analysts and IT Developers.

Attendees will gain a solid understanding of the benefits that SOA offers. The SOA BootCamp provides a solid understanding of SOA combined with directed interaction between attendees to discover how SOA can best benefit an organization.

### Business Challenge

To compete in today's tight markets, organizations must move from a structure of interfaced silos of activity to integrated, orchestrated performance. Legacy and ingrained corporate cultures, processes and infrastructure inhibit this integration, putting the achievement of strategic objectives at risk.

Service-Oriented Architecture (SOA) addresses this challenge, but only when the whole organization is on-board. The first step to addressing this challenge involves laying an integrated foundation of new skills and culture throughout an organization, centered on how and why to implement an SOA architecture.

The one-day session enables a better understanding of an SOA implementation as viable solution architecture for both short and long-term projects, and identifies positive, measurable business impact opportunities.

### SOA BENEFITS:

- ▶ Faster implementation and easier planning
- ▶ Investment protection
- ▶ Business risk reduction
- ▶ Enhanced collaboration
- ▶ Improved ROI

### FOR BUSINESS AND IT PROFESSIONALS

### SOA BootCamp delivers:

Principles, practices and success factors, as well as SOA fundamentals including how to:

- ▶ Dramatically reduce the time it takes to integrate assets and data derived from heterogeneous IT systems.
- ▶ Rapidly synthesize new corporate capability and agility to deliver measurable business value.
- ▶ Leverage and modernize systems without the cost and risk involved in ripping and replacing existing architecture.
- ▶ Utilize open standards thereby maximizing current and future flexibility.

The training helps in becoming more effective and productive in driving revenue and reducing cost through proven SOA tools and methodologies.

Software Excellence

A ROLTA COMPANY

- ▶ Faster Implementation
- ▶ Enhanced Collaboration
- ▶ Improved ROI

**SUCCESS REQUIRES  
SKILLED TEAMWORK**

## SOA BootCamp™

### MEASURABLE BENEFITS OF SOA BOOTCAMP

- ▶ The trained organization will understand how to create an SOA vision and identify the most important objectives to achieve through SOA to drive corporate strategy.
- ▶ All attendees will be able to clearly articulate and demonstrate the business benefits of SOA within the context of SOA vision and objectives.
- ▶ The team will gain practical, hands-on experience with SOA techniques and methodologies.
- ▶ Attendees will obtain a credential in SOA from a Master SOA Architect

Our intent is to position IT organizations for greater impact, building operational credibility and empowering CIOs as an officer of business agility.

Organizations can leverage “best-of-fit” technologies for a collaborative, step-by-step approach towards building a foundation for winning through SOA.

### **Rolta SOA Center of Excellence**

SOA Center of Excellence is a division of Rolta and is an internationally recognized leader in information technology solutions, providing integrated functional and technical solutions since 1988. Leveraging this in depth expertise, SOA Center of Excellence is leading the industry in providing a comprehensive suite of easy-to-use software solutions that enable access to an array of disparate data sources. An Oracle Certified Advantage Partner in both technology and applications, SOA Center of Excellence takes pride in helping companies develop successful business solutions through understanding and use of new technology tools.
