

Helping you grow your business success through SOA Today.

Business success depends upon access to the right information at the right time. The discipline of data integration plays a critical role in delivering this success. No business can remain competitive if they are making critical decisions based upon inaccurate or outdated information. Corporate decisions must be based on quality, reliable data.

So how do you accomplish this type of success? Simply put, it requires providing business and IT users a consolidated view of information. More specifically, integrating data spread across disparate systems and making it accessible in real-time. It means adopting an Service Oriented Architecture (SOA) strategy that brings rapid results.

Grounded in your company's corporate strategy, SOA Today delivers immediate value by educating, assessing and integrating your enterprise systems through rapid SOA approach. SOA Today is designed to provide ROI, today, so you immediately experience the power of SOA, while helping you plan for your long-term SOA Journey.

SOA promises great business improvements – agility, IT efficiency and optimized use of existing data assets. Yet traditional SOA solutions take too long to deliver the value promised. By the time the solutions come to fruition, business needs have changed, requiring a whole new development cycle.

SOA promises are plentiful, but many have become IT myth? How many resources has your organization invested in traditional SOA approaches with minimal results?

DELIVERING ON THE SOA PROMISE

New business capabilities and cost reduction are two examples of SOA promises that can be met with our SOA Today methodology. Additional examples include:

- ▶ Respond faster, and more accurately to customers' needs and new technologies.
- ▶ Increase operational effectiveness in areas ranging from product development, sales, and supplier interactions.
- ▶ Improve operational effectiveness in areas ranging from product development to sales and supplier interactions.
- ▶ Continue using existing data sources and applications without replacing the underlying data sources or applications.

AN AGILE APPROACH TO SOA

SOA Today embraces a unique, agile approach to deliver on the SOA promise with significantly less risk – and a much faster return-on-investment (ROI) – than traditional approaches:

- ▶ **Faster Time-To-Solution** – SOA Today delivers value from SOA within a few weeks of delivery, in contrast to months and years for traditional SOA approaches.
- ▶ **Simple Approach** – SOA Today leverages your organization's current assets and skill-sets. Our incremental and agile approach enables close customer interaction and quicker, more accurate solutions based on real-time customer feedback.
- ▶ **Fixed Price and Timeline** – SOA Today is scoped to meet your business needs within a fixed timeline and cost.

- ▶ Shorter Time-to-Solution
- ▶ Simple Approach
- ▶ Fixed Timeline and Cost

FULLY-INTEGRATED SERVICES, EDUCATION, AND TECHNOLOGY

SOA Today™

SOA TODAY = IMMEDIATE VALUE

SOA Today integrates services, education and innovative technology to meet your SOA needs through the following framework:

- ▶ **Requirements Workshop** – Reviewing the organization, scoping the project, and confirming our understanding.
- ▶ **SOA Bootcamp** – Providing SOA education for all SOA stakeholders.
- ▶ **SOA Visioning** – Assessing business needs, then creating a roadmap and business and technical plans for your success.
- ▶ **SOA Jumpstart** – Implementing pilot projects that demonstrate immediate value and illustrate your plan for success through SOA.

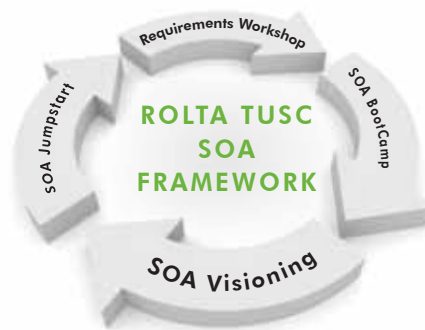

Providing services that range from advisory, to architectural to technical and innovative, our SOA practice, starting with SOA Today, is particularly effective in addressing the following needs:

- ▶ SOA governance.
- ▶ Legacy migration.
- ▶ Business Process Management (BPEL/BPM).
- ▶ Business Activity Monitoring (BAM).
- ▶ Business Intelligence (BI).
- ▶ SOA-based MIS/GIS integration.
- ▶ SaaS and Cloud enablement for SOA.
- ▶ Green data architecture design and delivery.
- ▶ Best practices and standards integration.

THE SOA TODAY DIFFERENCE

SOA Today starts with education. We teach your team the best ways to approach SOA and the advantages they can achieve. We help you to understand the needs of your business users – as well as empower you to be agile and adaptable – so that your solutions will continue to provide business value.

The SOA Today methodology uses web services to provide complete, real-time access to data and related business logic. Our tools support structured or unstructured data, regardless of location inside or outside of firewalls. Our solutions are available without the need for new programming skills or recoding of existing data source assets.

Utilizing our rapid prototyping and application development product, iPerspective™, we combine the speed and reliability of a pre-built software tool with the expert implementation skills of experienced SOA consultants. We can deliver a pilot project within your environment, usually within days, to demonstrate the power and simplicity of SOA-based solutions. This proof of concept empowers you for SOA success. Our full suite of SOA services are designed to grow with your organization through SOA maturity.

Rolta SOA Center of Excellence

SOA Center of Excellence is a division of Rolta and is an internationally recognized leader in information technology solutions, providing integrated functional and technical solutions since 1988. Leveraging this in depth expertise, SOA Center of Excellence is leading the industry in providing a comprehensive suite of easy-to-use software solutions that enable access to an array of disparate data sources. An Oracle Certified Advantage Partner in both technology and applications, SOA Center of Excellence takes pride in helping companies develop successful business solutions through understanding and use of new technology tools.
