Rolta OneView™ Helps DOTs Share the Right Data with the Right People at the Right Time
Capabilities showcased at Transportation Research Board Conference

Alpharetta, GA, January 12, 2015 – DOTs across the country face numerous challenges leveraging initiatives and investments to meet local, regional and national goals and priorities. To better meet the expectations of key stakeholders, transportation officials need a data-based analysis of operations and benchmarks against KPIs.

The ability to share data across the organization was identified as a critical need in the Transportation Research Circular, “Aligning Data Systems to Communicate with Decision Makers,” published in December, 2014 by the Transportation Research Board. The research recognizes that unless information is compiled from disparate systems across the enterprise and presented in dashboard view that is relevant to each specific stakeholder, critical performance parameters cannot be readily uncovered, leading to sub-optimal resource allocation, missed deadlines and operational inefficiencies. Rolta OneView meets the need for integrating and presenting a precise yet holistic view of a DOT’s operational effectiveness and efficiency, along with the tactical data managers need to achieve improvements, without the need for intervention by “IT specialists.”

“Rolta OneView allows transportation executives to quickly understand what is working, what isn’t, what soon may not, and to consider ‘what if’ scenarios,” said Satinath Sarkar, EVP of Rolta IP Solutions. “It touches the nerve center of all critical functions within the DOT, providing users with the status of hundreds of transportation-specific KPIs and business insights through descriptive, diagnostic, predictive and prescriptive capabilities.”

Rolta OneView delivers role-based actionable insights and correlated operations and business intelligence that supports informed decision making. It provides a 360° view of operations and specific metrics against MAP-21 KPIs by breaking down data silos that are often the fundamental barriers in achieving operational excellence. Dashboard views show a DOT’s progress in reaching key MAP-21 deliverables such as Safety, Infrastructure Condition, Congestion Reduction, System Reliability, Freight Movement and Economic Vitality, Environmental Sustainability and Reduced Project Delivery Delays. Rolta OneView also shows the impact of different investment choices under various scenarios to help identify and prioritize projects.

“No other solution combines the power of Business Intelligence technologies with the depth of asset and performance insights and the breadth of integrated departmental databases which can give you the insights you need to meet MAP-21 funding requirements,” Sarkar said.

Rolta OneView will be showcased in booth #301 at the Transportation Research Board Annual Meeting, January 11 – 15, 2015 in Washington, DC. Rolta experts will be joined at the booth by Ralph Menzano, Oracle’s Executive Director for Global Transportation Industry Solutions.

About Rolta: Rolta is a leading provider of innovative IT solutions for many vertical segments, including Federal and State Governments, Defense, Homeland Security, Utilities, Oil & Gas, Financial Services, Manufacturing, Retail, and Healthcare. By uniquely combining its expertise in the IT, Engineering and Geospatial domains, Rolta develops exceptional solutions for these segments. The Company leverages its industry-specific know-how, rich repository of field-proven intellectual property that spans photogrammetry, image processing, geospatial applications, Business Intelligence, Big Data analytics, Cloud computing, and Software Defined Infrastructure for providing sophisticated enterprise-level integrated solutions. Rolta is a multinational organization headquartered in India. The Company operates from 40 locations worldwide through its subsidiaries, and has executed projects in over 45 countries. Rolta is listed on the Bombay Stock Exchange and National Stock Exchange in India. The Company's GDRs are listed on the Main Board of London Stock Exchange. The Company's 'Senior Notes' are listed on Singapore Stock Exchange.
