Rolta Unveils Service-Oriented Solutions that Empower Customers to Realize Rapid ROI

MUMBAI, April 8, 2009 - The Rolta SOA Center of Excellence, a software division of Rolta and leading provider of agile service-oriented architecture (SOA) solutions, unveiled 'SOA Today'. The 'SOA Today' solution comprises service and software offerings that are customized to quickly deliver business results using a services-oriented approach. Unlike traditional SOA solutions, 'SOA Today' provides customers with rapid return on investment (ROI) due to a shorter implementation time and an agile approach to managing the transition to service orientation. Additionally, the solution makes possible the use of other innovative services, including: cloud enablement, open virtualization, green computing and managed services.

'SOA Today' allows CTO's to quickly bring corporate strategy in line with business user needs while modernizing/upgrading their IT systems and uniquely makes information stored in disparate databases and heterogeneous platforms securely available and re-usable across the enterprise. 'SOA Today' leverages powerful Rolta software that enables productive interactions with business users. By delivering rapid, modular solutions that readily align with business strategy; 'SOA Today' enables enterprises to quickly respond to business changes with agility and to leverage investments in legacy applications infrastructure.

The 'SOA Today' solution incorporates Rolta's exceptional IPR (patent filed in US) and comprehensive consulting services for assessing and defining an organization's current environment with respect to enterprise application (EA), business process management (BPM) and governance, and developing and implementing the right SOA solution.

Rolta's 'SOA Today' solutions are ideal for customers in a wide variety of verticals including government, utilities and telecom, banking/finance, healthcare and energy. By delivering value in a matter of days or weeks - in contrast to the months needed for results with traditional approaches - SOA Today provides a practical and cost-effective means to the users to exploit the wealth of data locked up in their IT infrastructure and brings tremendous value to stakeholders, by improving effective decision-making, across the enterprise.

In a recent SOA engagement, Rolta was able to create a web service in minutes (by using 'SOA Today') that previously took seven days for the customer to create using different tools and methodologies resulting in significant cost savings on development time, and in addition providing huge advantages in terms of increased opportunity due to improved time-to-market, reduced wait times and increased user participation in and commitment to design and deployment.

"With the introduction of SOA Today, Rolta has successfully addressed the challenge of delivering an agile SOA solution that can be deployed quickly, without the need to make heavy investments in new programming" said Mr. K. K. Singh, Chairman and Managing Director of Rolta.
