Rolta Offers Cutting-Edge Geoimaging Technologies to Serve Global Markets

Mumbai – Rolta today announced that it has entered into a definitive agreement with PCI Geomatics Enterprises, Inc. of Canada, whereby Rolta has acquired licenses with perpetual rights to the complete portfolio of PCI's geo-imaging technologies, including source code, design and software architecture exclusively for India and non-exclusively throughout the rest of the world. PCI is a market leader in the geoimaging segment, with an installed base of 400 licenses in India, and over 21,000 licenses in more than 135 countries world-wide.

In combination with Rolta's own offerings in photogrammetric mapping and related applications, Rolta will now be able to offer world-class solutions for processing stereo and mono satellite imagery in areas such as environmental modeling, forestry and natural resources, emergency planning and management, agriculture, security and defense. Further, this comprehensive technology agreement provides Rolta with access to ongoing and future PCI research and development, as well as new products and technology innovations. Rolta has also purchased all assets of PCI Geomatics India Pvt Ltd, and has acquired exclusive perpetual rights for these technologies and its customers in the Indian subcontinent.

Over the past few years, Rolta has established a robust product development organization which has successfully developed numerous geospatial products and solutions for defense and other markets, such as the Rolta Automatic Change Detection – a sophisticated solution that enables users, especially for defense applications, to automatically analyze differences between two sets of imagery for strategic and tactical decision-making. With the licensing of PCI Geomatics' technology stack under this and certain earlier agreements, Rolta will be able to jump-start development of additional state-of-the-art imaging solutions that will augment its portfolio of offerings in the geospatial space, further strengthening Rolta's solid reputation in this field worldwide. Rolta will develop solutions using core PCI Geomatics/Rolta technologies for release globally. Key products that Rolta is now releasing into the market in India and as part of Rolta solutions throughout the rest of the world are:

- **Rolta Geomatica:** a suite of integrated desktop software products that features remote sensing, digital photogrammetry, geospatial analysis, map production, mosaicking and automated production systems capabilities.
- **Rolta GeoImaging Accelerator:** a suite that provides a significant improvement in speed and efficiency through improved data handling, and distributed multi-threaded processing. By optimizing and automating workflows, traditional image-processing is elevated to industrial-strength production with phenomenal results – as much as 60 to 80 times faster than traditional processes – especially suited to needs of near real-time processing for applications in disaster management and defense.
- **Rolta GeoConference:** a web-based suite of products that provides an interactive environment and common workspace for users to share maps, images and to exchange geospatial information in real time. Since everyone is able to look at the same georeferenced map, geospatial intelligence can effectively and easily be integrated into various decision-making processes.

"We are very pleased with our relationship with Rolta," said Terry Moloney, Interim President and CEO, PCI Geomatics. "This agreement is beneficial to both parties for it leverages each other's expertise, market knowledge and reach. In combination with PCI's cutting-edge technologies, Rolta's solutions will provide unique opportunities to customers world-wide to better exploit modern imaging applications."

Mr. K.K. Singh, Chairman and CEO of Rolta said, "This strategic and comprehensive technology partnership with PCI Geomatics is an important milestone in the evolution of Rolta as a major global player in the geospatial technology space. This will enable us to offer world-class end-to-end solutions to our customers globally for applications in mapping and earth sciences, and to provide enterprise-level integration of their organizations' spatial and non-spatial data through Rolta GeospatialFusion™."

About PCI Geomatics

PCI Geomatics is a world leading developer of software and systems for geo-imaging solutions. Since 1982, PCI Geomatics has specialized in remote sensing, digital photogrammetry, spatial analysis, cartographic production,

automated production systems, image management and on demand mapping solutions. PCI Geomatics' advanced software systems address a wide variety of industry applications including the environment, agriculture, security and intelligence, aerospace & defense, and satellite receiving stations. PCI Geomatics has the expertise and know-how to turn images into useful information.

About Rolta:

Rolta is an Indian multinational organization that has executed projects in over 40 countries. Rolta serves these markets by providing innovative solutions in Enterprise Geospatial Information Solutions (EGIS), Defense & Homeland Security; Enterprise Design & Operations Solutions (EDOS); and Enterprise Information Technology Solutions (EITS). Rolta, through its joint venture with the Shaw Group Inc. USA – Shaw Rolta Ltd. – provides comprehensive Engineering, Procurement and Construction Management (EPCM) services to meet turnkey project requirements of power, oil, gas and petrochemical sectors. Rolta provides state-of-the-art C4ISTAR information systems, Military Communications, Digital Soldier and Vehicle System solutions, covering the entire "sensor to shooter" chain based on Rolta IP, which is integrated with high-end technology sourced from world leaders like - Thales through our Joint Venture, Rolta Thales Limited. Rolta, headquartered in Mumbai, employs over 4500 professionals with countrywide infrastructure and international subsidiaries across the globe. The Company has benchmarked its quality processes with the world's best quality standards. Rolta is accredited with the prestigious BSI ISO/IEC 27001:2005 certification, the ultimate benchmark for information security; the BSI ISO/IEC 20000-1:2005 IT Service Management Standard; and the Company has been assessed at Maturity Level 5 of the Capability Maturity Model Integrated CMMI SW version 1.1 in 2006. The Company is now engaged in upgrading to Maturity Level 5 of version 1.2. Forbes Global has ranked Rolta amongst the "Best 200 under a Billion" for four times in six years. Rolta has been included in the S&P Global Challengers List™ 2008, by Standard & Poor's. This List identifies 300 mid-size companies worldwide that have shown the highest growth characteristics along dimensions encompassing intrinsic and extrinsic growth. Rolta was ranked at the #1 position in Human Relations (HR), and at the 3rd position in overall ranking in the 2009 DATAQUEST survey of Best Employers in the IT sector. The Company is listed on the NSE in cash and F&O segment and forms part of CNX IT, NIFTY Midcap 50 and CNX 500 indices. The Company is also listed on BSE 'A' group and forms part of BSE Midcap, BSE 200, BSE 500, BSE IT and BSE TECK indices. The Company's GDR is listed on the Main Board of London Stock Exchange and its FCCB's are listed on the Singapore Stock Exchange.
