Rolta Enhances Maritime and Homeland Security Solutions Through Partnership with Augusta Systems

Mumbai - Rolta announced today that it has signed a partnership agreement with Augusta Systems, Inc., a provider of technologies that power the intelligent convergence of devices, systems and networks. Through the partnership, Rolta will be able to incorporate Augusta EdgeFrontier middleware for use in security, defense and other geospatial applications where sensor integration and fusion are essential elements in providing situational awareness. EdgeFrontier is field-proven, and has been successfully deployed by government organizations with security mandates, such as the United States (U.S.) Department of the Defense and multiple public safety and port management agencies in U.S. and other North American jurisdictions, as well as security divisions in businesses ranging from Fortune Global 1000 companies to regional utilities.

Identifying real security threats from the flood of information available is today a vital concern. Rolta's Maritime and Homeland Security Solutions provide users with a highly configurable, security-based, situation-awareness platform, which allows security operations personnel, command and control centers, intelligence analysts and others to collaboratively interpret information and make actionable recommendations for vessel traffic management, critical off-shore and on-shore asset protection, fisheries control, search and rescue operations, the prevention of contraband trafficking and public safety operations. By leveraging EdgeFrontier, Rolta will be able to rapidly integrate diverse types of sensors and systems for public safety, port and border security, and defense operations which require sensor and system technologies such as camera controls and management, video management systems, radars, ground sensors, CBRNE sensors, registration and tracking systems, emergency management communication systems, geographic information systems, alert and notification systems and others to be seamlessly integrated.

"Security and defense agencies have found EdgeFrontier to be the ideal platform for building and managing applications featuring data and control functions from diverse devices and systems," said Patrick Esposito, President and Chief Executive Officer of Augusta Systems. "These EdgeFrontier capabilities, coupled with Rolta's market knowledge and technical solutions are uniquely positioned to help agencies around the world protect critical infrastructure and save human lives. We are very pleased to partner with Rolta to advance homeland security, defense and geospatial solutions."

"Real-time sensor information management is a major challenge in providing robust situational awareness during both normal operations and crisis periods, when the amount of raw sensor data can become overwhelming. EdgeFrontier enhances Rolta's capability to rapidly build flexible, configurable systems to intelligently process, integrate, and control sensor networks. Rolta's clients will indeed benefit from our partnership with Augusta Systems as we work to make our world more secure and safe," said John Halsema, Rolta Senior Vice President Public Safety and Homeland Security Solutions.

About Rolta: Rolta is an Indian multinational organization that has executed projects in over 40 countries. Rolta serves these markets by providing innovative Enterprise Geospatial & Defense Solutions (EGDS), Enterprise Design & Operations Solutions (EDOS) and Enterprise Information Technology Solutions (EITS). Rolta provides comprehensive Engineering, Procurement and Construction Management (EPCM) services to meet turnkey project requirements of power, oil, gas and petrochemical sectors. Rolta provides state-of-the-art solutions for C4ISTAR information systems, Military Communications, Digital Soldier, and Vehicle Systems, covering the entire "sensor to shooter" chain, and sophisticated Homeland Security Solutions based on its own intellectual property, including technologies acquired from world leaders, and by leveraging its partnerships with leading defense and security companies. Rolta, headquartered in Mumbai, employs over 4000 professionals with countrywide infrastructure and international subsidiaries across the globe. The Company has benchmarked its quality processes against the world's best quality standards. Rolta is accredited with the prestigious ISO 9001:2008, the standard for Quality Management System; BSI ISO/IEC 27001:2005 certification, the ultimate benchmark for information security; the BSI ISO/IEC 20000-1:2005 IT Service Management Standard, and the Company has been assessed at Maturity Level 5 of the Capability Maturity Model (CMM). Forbes Global has ranked Rolta amongst the "Best 200 under a Billion" for four times in six years. Rolta has been included in the S&P Global Challengers List™ 2008, by Standard

& Poor's. This List identifies 300 mid-sized companies worldwide that have shown the highest growth characteristics along dimensions encompassing intrinsic and extrinsic growth. Rolta has been ranked at the #2

position as a preferred employer and at the 4th position in overall ranking in the 2010 DATAQUEST survey of Best Employers in the IT sector. The Company is listed on the Bombay Stock Exchange and National Stock Exchange in cash and F&O segment, and forms part of various indices on BSE/NSE. The Company's GDRs are listed on the Main Board of London Stock Exchange and its FCCBs are listed on the Singapore Stock Exchange.

About Augusta Systems: Augusta Systems, Inc. powers the intelligent convergence of devices, systems and networks. The award-winning Augusta Systems® EdgeFrontier® products provide configurable platforms for building and managing complex monitoring, control and automation solutions, including applications for safety and security, energy and utility management, asset tracking, building management and other business functions.
