Rolta Announces the Release of Rolta OneView™ Enterprise Suite 3.0

Rolta today announced the release of Version 3.0 of its flagship product Rolta OneView™ Enterprise Suite for Process Industries including Upstream and Downstream Oil and Gas, Petrochemicals, Chemicals, Power and Metals. Rolta OneView™ is an innovative BI solution with field-proven benefits for plant operators to significantly improve operational efficiencies and reliability. This Suite has been developed by leveraging Rolta's deep understanding of Process and Power operations coupled with its technology expertise in Business Intelligence and Enterprise Integration.

One of the major challenges in these industries is to improve operational performance without compromising safety, regulatory compliance and corporate goals. However, accessing, collating, understanding and analyzing the data from disparate sources and systems to improve operational efficiency cannot be accomplished without the ability to translate data into cross functional KPIs, and KPIs into actionable intelligence through data drill down and easy custom reporting. Frost & Sullivan, in a white paper for Oil & Gas Information Technology, titled 'Enabling Operational Excellence' stated that "solutions such as Rolta OneView™ will play a critical role in transforming plant management and drive growth."

According to Sid Snitkin, Vice-President, ARC Advisory Group, "Rolta OneView™ solves two critical issues that constrain operational excellence programs across the process industries. First, its powerful analytics core bridges the traditional divide between enterprise and plant floor solutions for performance management, empowering plant personnel to better analyze their operations and drive higher levels of performance. Second, its broad suite of pre-configured user interfaces for every aspect of operational excellence overcomes departmental silos that plague most plants, enabling organizations to develop new, cross-functional KPIs that can drive more effective collaboration and problem solving. Clearly, Rolta OneView is an enterprise-class solution that can bring significant benefits and savings to process and power corporations."

Rolta OneView 3.0 Operational Insights covers many process and power industry functional areas in operations such as production, maintenance, reliability, HSE, quality, and MRO and site supply chain. Rolta OneView™ provides Executive Management a powerful Strategy Management tool by supporting initiatives such as Balanced Scorecards, Six Sigma, TQM etc. Major benefits include pre-empting reliability related failures, reducing reportable environmental events, steadily increasing uninterrupted runs of operating units, and lowering operating costs due to more responsive analytics.

This latest suite features a powerful Universal Connector Framework built on Rolta's patent-pending iPerspective™ integration suite. One View™ interfaces with all commonly used point-solutions, and has pre-built but extensible Key Performance Indicators, and versatile calculation engines. The Rolta OneView™ solution is available on BI technology platforms from global leaders.

Speaking on the occasion, Mr. K.K. Singh, Chairman & Managing Director of Rolta said, "We are very happy to note that the innovative Rolta OneView solution is gaining rapid acceptance across the globe. The Process and Power Industry is looking for break-thru results and we are pleased to provide the software technology that enables this to happen."

About Rolta: Rolta is a leading provider of innovative IT solutions for many vertical segments, including Utilities, Governments, Transportation, Process, Power, Banking and Insurance. These enterprise level solutions are built around Rolta's intellectual property and domain expertise to offer unique business intelligence for impactful insights for effective decision making. Rolta's solutions framework includes Rolta Geospatial Fusion™, a suite to integrate disparate spatial and business data; Rolta OneView™, a BI solution for operational excellence; and Rolta iPerspective™, a unique platform for SOA and "Cloud" enablement. Rolta's intellectual property repository contains cutting-edge software for mapping and earth sciences, providing the foundation for Defense and Homeland Security solutions including C4ISTAR information systems, Military Communications, Digital Soldier, and Vehicle Systems. Rolta is a multinational organization headquartered in India, which has executed projects in over 40 countries. Rolta has a countrywide infrastructure and international subsidiaries across the globe. Forbes Global ranked Rolta amongst the "Best 200 under a Billion" four times in six years. The Company is listed on the Bombay Stock Exchange and National Stock Exchange in cash and F&O segment, and forms part of various indices

on BSE/NSE. The Company's GDRs are listed on the Main Board of London Stock Exchange and its FCCBs are listed on the Singapore Stock Exchange.
