Qatar's Ashghal Teams with Rolta to Implement Unique System for Capital Project Management

Mumbai: Qatar's public works authority, Ashghal, in partnership with Rolta has successfully implemented a unique, geocentric system for capital project request management called "Moazanah". The successful implementation reinforces Rolta's strong track record in providing domain expertise and sophisticated technology solutions to lead and manage innovative large projects.

The Moazanah project was envisaged by Ashghal's Engineering Business Services Department to develop a solution that was easy to use by over 23 agencies, involving hundreds of end-users needing to access numerous details associated with each of many diverse projects.

Rolta OnPoint™, the spatial engine at the heart of Rolta Geospatial Fusion™, is the cornerstone of Moazanah. This solution also leverages Microsoft SharePoint and Esri's ArcGIS Server. New levels of operational insights are made possible through this solution that allows users to easily access data in an extremely user-friendly and cost-efficient manner. The Rolta solution provides invaluable insights to management into sharing of capital budgets between the regions in the country, and an opportunity to optimize capital expenditure. For example, the system can facilitate significant cost savings by synchronizing road closures for two projects in the same vicinity.

Engineer Nasser Ali Al Mawlawi, Ashghal's President, commented, "Moazanah manages our government infrastructure projects from beginning to end. It has not only expedited the review and approval process, but we are already seeing cost savings, which will undoubtedly result in a significant return on investment." Abdussamad Mohamed Al Makei, Ashghal Manager of the Engineering Business Services Department, added that "Moazanah provides us with a forum to discuss and analyze the country's infrastructure project proposals so that we can confidently move forward with them knowing they are properly managed and within budget."

Mr. Shafik Jiwani, Executive Vice President of Rolta Middle East stated, "We recognized early that Ashghal had very ambitious plans for this system. It was quite a challenge to develop an interface that felt intuitive to the end-user so that the system could be effectively used for making informed business assessments and timely decisions. We applaud Ashghal for their vision and drive for conceptualizing and implementing this project." "The success of this project once again demonstrates the versatility and robustness of the Rolta Geospatial Fusion™ solutions platform and its powerful Rolta Onpoint™ engine," he added.

About Rolta: Rolta is a leading provider of innovative IT solutions for many vertical segments, including Utilities, Governments, Transportation, Process, Power, Banking and Insurance. These enterprise level solutions are built around Rolta's intellectual property and domain expertise to offer unique business intelligence for impactful insights for effective decision making. Rolta's solutions framework includes Geospatial Fusion™, a suite to integrate disparate spatial and business data; Rolta OneView™, a BI solution for operational excellence; and Rolta iPerspective™, a unique platform for SOA and "Cloud" enablement. Rolta's intellectual property repository contains cutting-edge software for mapping and earth sciences, providing the foundation for Defense and Homeland Security solutions including C4ISTAR information systems, Military Communications, Digital Soldier, and Vehicle Systems. Rolta is a multinational organization headquartered in India, which has executed projects in over 40 countries. Rolta has a countrywide infrastructure and international subsidiaries across the globe. Forbes Global ranked Rolta amongst the "Best 200 under a Billion" four times in six years. The Company is listed on the Bombay Stock Exchange and National Stock Exchange in cash and F&O segment, and forms part of various indices on BSE/NSE. The Company's GDRs are listed on the Main Board of London Stock Exchange and its FCCBs are listed on the Singapore Stock Exchange.
